

## AVCAL Award - SCADAgrouP Best Buyout <\$100m

Our recent **AVCAL award acknowledges the successful sale of SCADAgrouP** - a global provider of systems integration services and SCADA products to the water, waste water, oil and gas industries - to Schneider Electric.

The A\$200m valuation delivered the Advent IV fund a return of seven times it's original investment - reflecting the fact that the Company is now a world-class strategic asset.

This standout return to shareholders secured Advent the coveted AVCAL annual award, in recognition of the achievements of SCADAgrouP and its management team. In the current environment - with its paucity of exits - the award is especially pleasing.

SCADA is expected to continue to expand successfully under Schneider's ownership as it aligns with Schneider's efforts to secure major positions in the water, waste water and oil & gas markets in Australia, Europe and North America.
